Job Title: Web Administrator

Position Overview:

As a Web Administrator, you will be responsible for website development and website maintenance, manage server performance and security, and collaborate with teams to align web strategies with business goals. The position requires proficiency in web development, strong troubleshooting skills, and a relevant bachelor's degree.

Key Responsibilities:

1. Website Development and Maintenance:
 - Website and portal development based on company's requirement.
 - Regularly update and maintain the company website, ensuring content accuracy and relevance.
 - Collaborate with cross-functional teams to obtain and update content, images, and multimedia elements.
2. Server Management:
 - Monitor and manage web server performance, security, and availability.
 - Conduct routine server backups and implement disaster recovery procedures.
3. Content Management:
 - Utilize content management systems (CMS) to update and publish web content.
 - Optimize website content for search engines (SEO) to enhance visibility and accessibility.
4. Troubleshooting:
 - Identify and resolve website issues, including broken links, errors, and other technical problems.
 - Work closely with IT support to address server-related issues and ensure seamless website functionality.

TIH/iHub Drishti/2023-24/Recruitment/18; Dated: 13 December 2023

N.H. 62, Nagaur Road, Karwar, Jodhpur 342037, Rajasthan (India)

5. Security:

- Implement and maintain web security protocols to protect against potential threats and vulnerabilities.
- Stay informed about the latest trends and technologies in web security.

6. Collaboration:

- Collaborate with internal teams, including marketing, design, and IT, to align web initiatives with overall business goals.
- Provide technical support and guidance to team members as needed.

7. Any other tasks assigned by the management.

Essential Qualification:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Minimum post-qualification relevant experience of 2 years

Desirable:

- Thorough understanding of Creation and maintenance websites, web applications, portal management with running regular checks on network and data security.
- Knowledge of monitoring site security; reports suspected or actual security breaches and denial of service attacks.
- Experience of software design and development experience in Spring Framework, J2EE technologies, JSP, JDBC, XML.
- Good database/SQL knowledge in RDBMS PostgreSQL/Oracle/Db2 or in any other RDBMS tool.
- Strong analytical, verbal, written communication and problem-solving skills.
- Excellent organizational skills and attention to detail.
- Fluency with markup and programming languages including Knowledge of JavaScript HTML, XML and CSS.
- Expertise with PHP, MY SQL
- Hands-on Joomla Themes, Plugins development, Drupal, Wordpress Themes and Modules customization
- Proficient with Microsoft Office Suite, Adobe Creative Suite, and other related software.
