Startup Seed Support Program By iHub Drishti Foundation, IIT Jodhpur
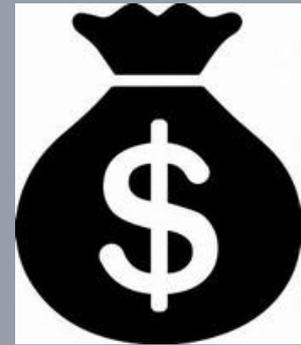

Program Details & Features

- iHub Drishti Foundation, IIT-Jodhpur initiates this program to support the startups for seed support. It will nurture and supports technology based new startups in the fields of Computer Vision, Augmented Reality & Virtual Reality.
- It is a equity based funding support program.
- The aim of this program is providing financial assistance to potential startups with great ideas, innovations and technologies, which are at initial stages. The seed grant will help them to grow.
- This provides seed funding of up to 50 Lakhs post proper screening and evaluation.
- The seed support will help the selected startups to reach a position where they will be able to raise funds from angel funding schemes, apply for loans from banks and seek funding from big industrialists. Under this program, TIH-iHub Drishti foundation will also help the startups to connect with theses investors at later stage.

Other Support

- iHub Drishti also has other various programs for startups and other ventures with great ideas, innovations, and technologies to enable them to survive and grow in the current market.
- Technical Support from IIT Jodhpur and other partner & premier national & international institute's faculties.
- Incubation support from TISC (Technology Incubation & Startup Centre, IIT Jodhpur) and other relevant Incubators.
- Support in business marketing, commercialization of the product. Support in connecting with government organizations for the data or any other support.
- Support to expand the professional network with potential investors or potential partners.
- Guidance & support from various domain experts and industry partners.
- Access to dedicated labs for Augmented Reality & Virtual Reality lab, Vision base Autonomous lab, Data Collection and Annotation Lab, Real-time Computer Vision and Sensing Lab, Trustable Visual Intelligence Lab & Visual Computing Lab at TIH iHub Drishti.
